**YARNS** - There is a minimum weight requirement of 20 lbs clean fibre per batch of yarn, which usually requires between 40lbs and 50lbs of raw fibre depending on how clean and well skirted it is. In order to process on our machines, the fibre from some wool breeds (eg. Romney, Leicester, Shetland, Costwold) must be blended with fine wool such as Merino or Rambouillet. We make the following yarns:
